## DETAILED ACTION

### *Election/Restrictions*

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions, which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 37-66, drawn to a combination comprising microfibrils.

Group II, claim(s) 67, drawn to a process for preparing a combination.

Group III, claim(s) 68-69, drawn to a polymer.

Group IV, claim(s) 70-71, drawn to an article.

Group V, claim(s) 72-73, drawn to a tyre.

Group VI, claim(s) 74, drawn to a battery separator.

2. The inventions listed as Groups I, II, III, IV, V, and VI do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the shared special technical feature of the groups is microfibrils cited in claim 1. The special technical feature linking the inventions is anticipated by Gregory et al. (U.S. Patent No. 4,952,278), and therefore, does not provide a contribution over the prior art, and no single general inventive concept exists. Therefore, restriction is appropriate. The inventions are distinct, each from the other because of the following reasons:

3. If the Applicant were to elect Group I, further restriction would be required in the matter of an election of species. This application contains claims directed to the following patentably distinct species of the claimed invention. First, an election of species is required for one of the following types of microfibrils: cellulose, ceramic, carbon, or organic. Second, an election of species is required for one of the following types of mineral particles: oxides (including hydroxides and hydroxycarbonates), carbonates, cerium or lanthanum compounds, SiC, or carbon black. Further, if in the course of the first election, cellulose microfibrils are elected, a further election must be made among the species of claim 55, which cites additional compounds that are combined with the cellulosic microfibrils.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 37-42 and 63-66 are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims

are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

4. A telephone call was made to Eleanor Hakim on September 5, 2002 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jeremy R. Pierce whose telephone number is (703) 605-4243. The examiner can normally be reached on Monday-Thursday 7-4:30 and alternate Fridays 7-4.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Terrel Morris can be reached on (703) 308-2414. The fax phone numbers for the organization where this application or proceeding is assigned are (703) 872-9310 for regular communications and (703) 872-9311 for After Final communications.
